

Right On Track: Introducing the largest press brake in North America

Superior infrastructure requires superior technology. AT&F now offers high-speed railway system manufacturers the largest, most advanced press brake in North America. Our press brake has the power, precision and flexibility you need to develop high-quality transport infrastructures.

Features:

- Hydraulic single ram press
- Up to 60 feet in length and 2800 metric tons
- 750 mm stroke
- Dimensions:
 - 60 ft (18 m) long
 - Generous throat depth
 - Large daylight opening
 - Wide housings space
- 16 CNC axis
- Front and rear CNC gauging
- Assist positioning precision

Benefits:

- Long-forming structural components
- Very tight tolerances across very long lengths
- Consistent, repeatable process allowing for streamlined component designs
- Programmable system allows adjustable stroke and ram speed for process optimization
- Single ram press eliminates multiple housings and maximizes extensive throat depth

AT&F has a long history of unsurpassed capacity, proven quality and vast experience in steel plate processing and fabrication.
