

World-Class Manufacturing In A "Green" World

American Tank & Fabricating, a value-added Steel and Fabricating Service Center, is committed to world-class environmental management. Both through its internal practices and on behalf of its customers, AT&F models "green manufacturing" in every way possible.

- Making unique contributions to primary "green" technologies, such as cellulosic ethanol, wind, solar, and nuclear power.
- Applying environmentally-friendly production practices — from purchasing to construction to production, and passing savings onto customers.
- Internalizing a reuse-reduce-recycle strategy to slash waste removal and energy costs by 33 percent.

AT&F helps you harness the world's energy — and helps the world to conserve it.
